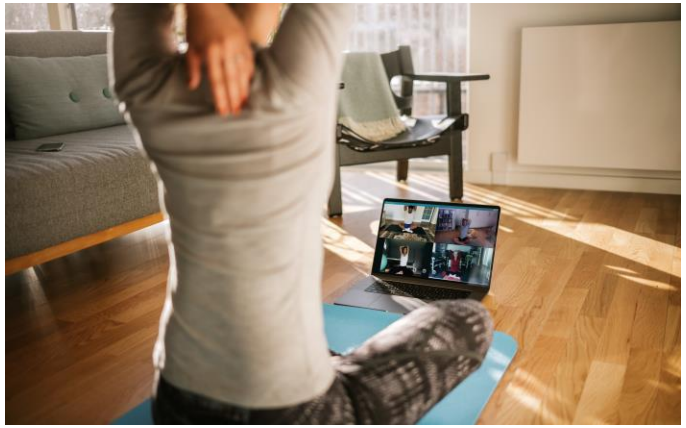
The lockdown lifts:
We enter the “New Hybrid” office

Our world has changed

Less travel

More home office

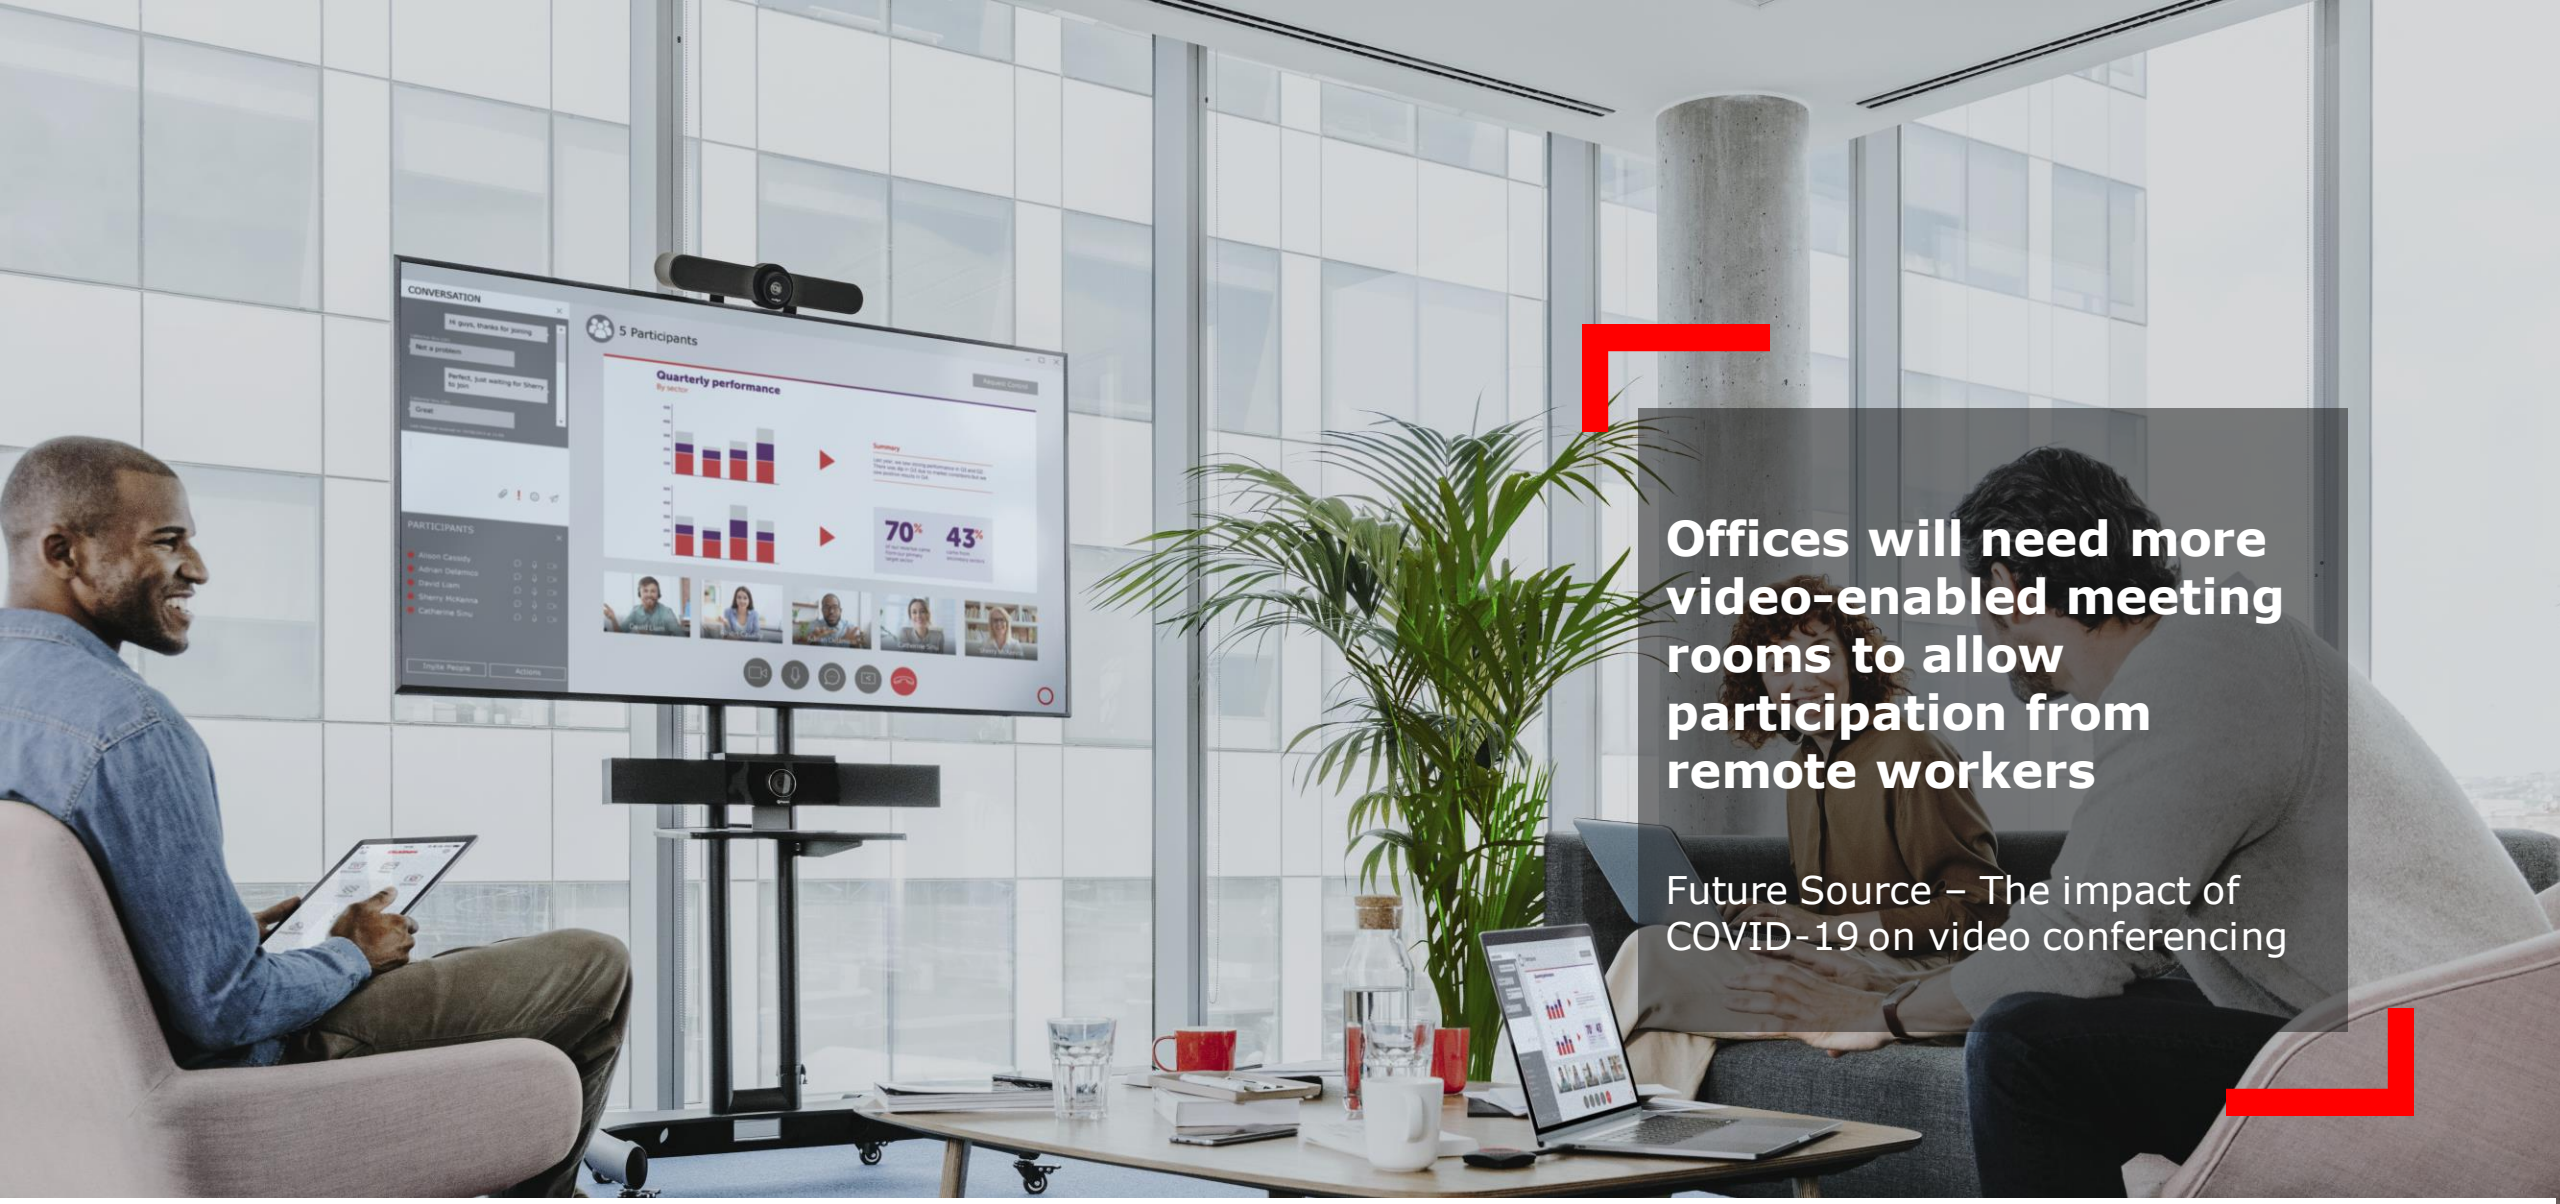
More distance in meeting rooms



Everyone video conferencing

2 years of digital transformation in 2 months

Satya Nadella – Microsoft CEO

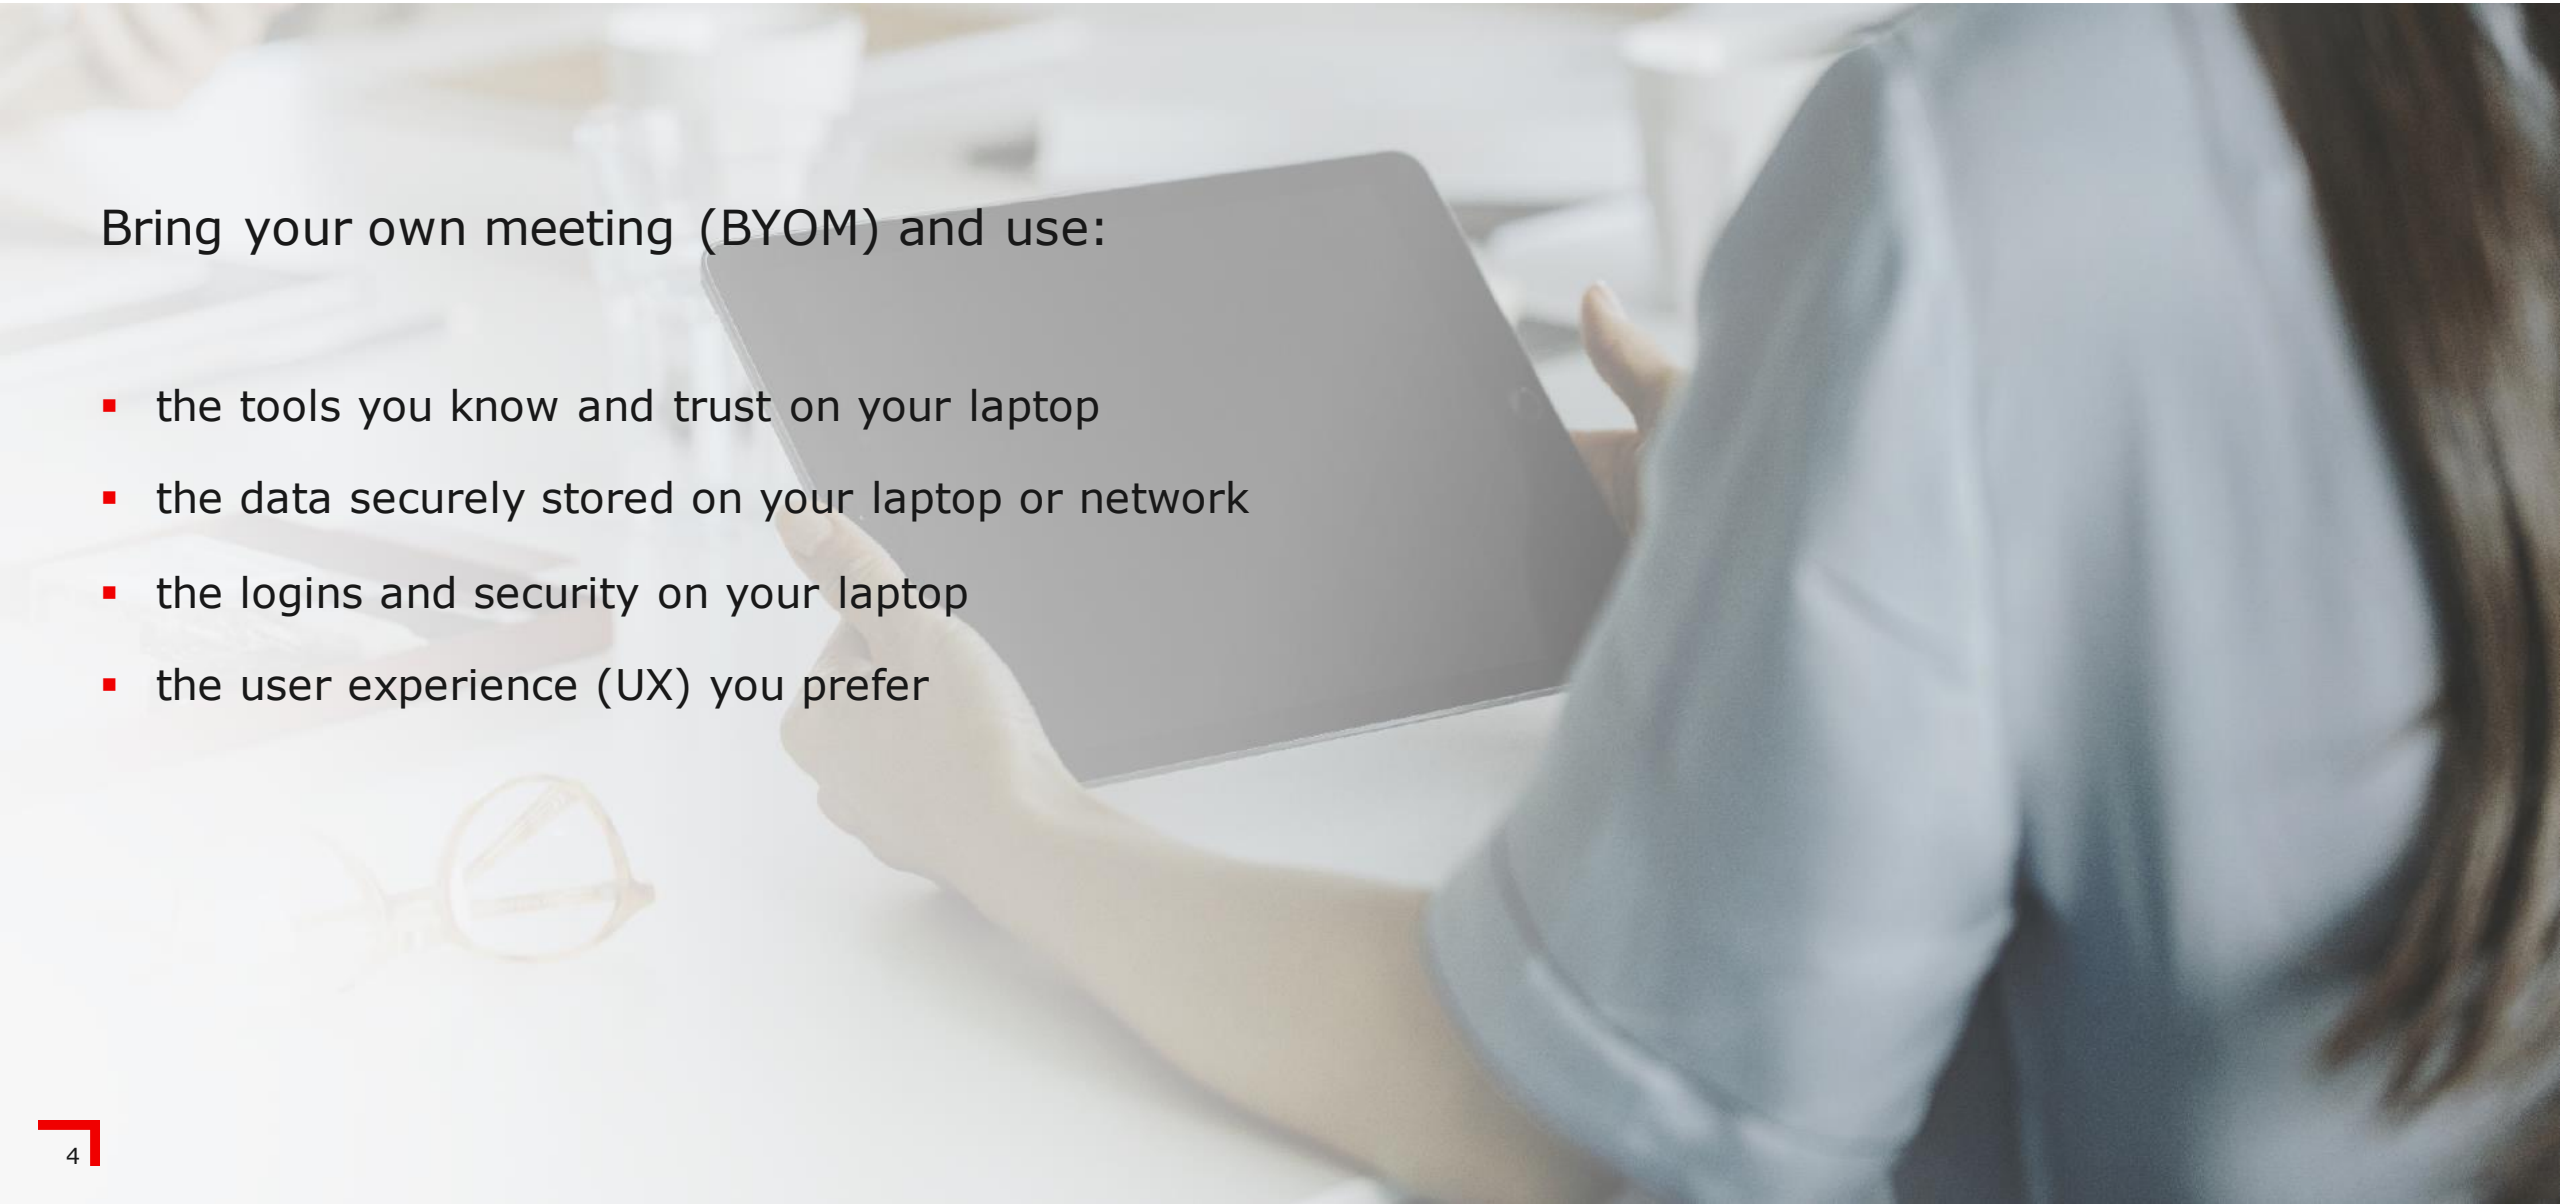


Offices will need more video-enabled meeting rooms to allow participation from remote workers

Future Source – The impact of COVID-19 on video conferencing

These changes force a new look at how to enable collaboration

BYOM is the answer



Bring your own meeting (BYOM) and use:

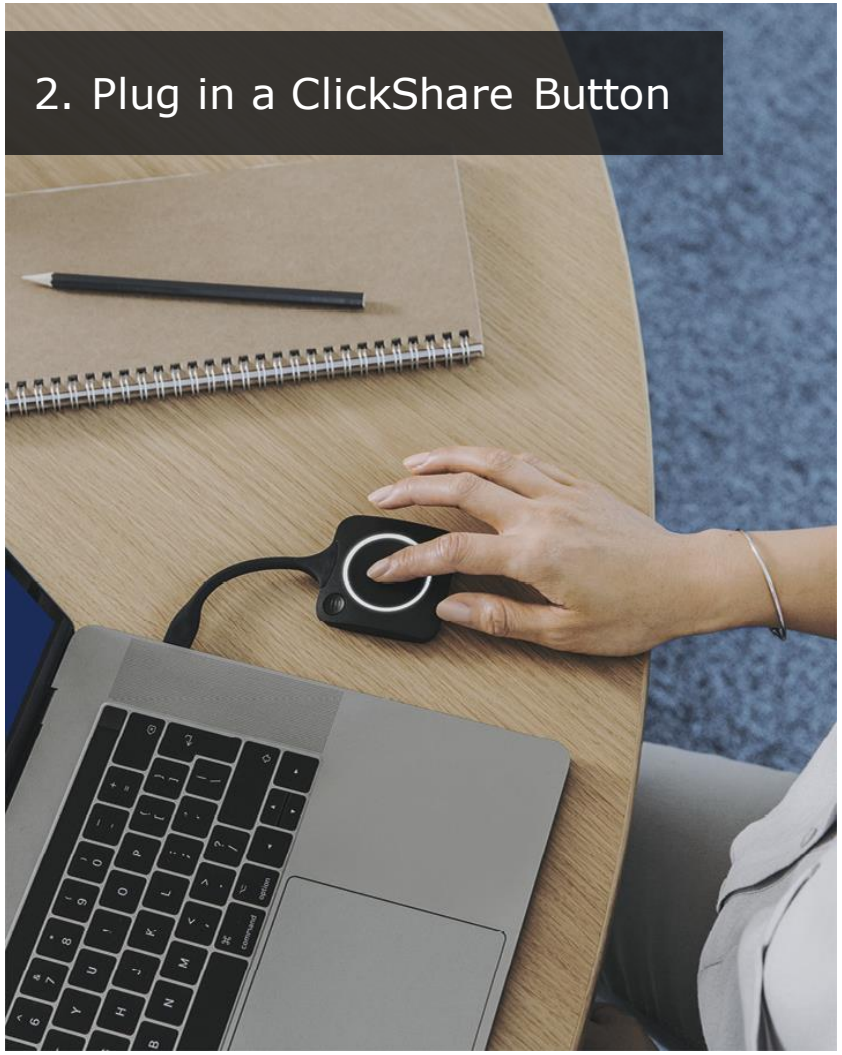
- the tools you know and trust on your laptop
- the data securely stored on your laptop or network
- the logins and security on your laptop
- the user experience (UX) you prefer

ClickShare

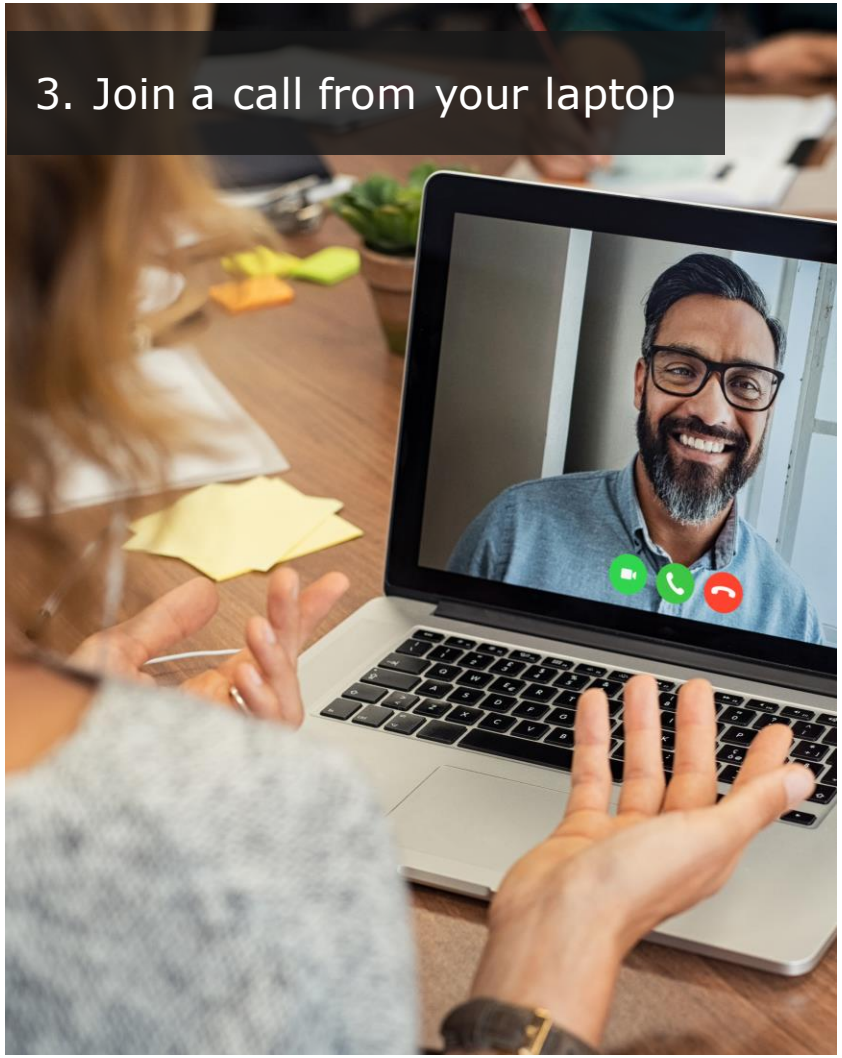
CONFERENCE

3 easy steps to Bring Your Own Meeting (BYOM)

Get ready to conference



Extend your laptop to the whole room



Bring your meeting to the meeting room

Improve engagement – improve remote collaboration

The remote experience…

without ClickShare in the meeting room

Remote participants can see and hear what's shared through someone's laptop camera and microphone

The remote experience…

with ClickShare Conference in the meeting room

Remote participants can see and hear what's shared through the meeting room camera and microphone

Conference with the new ClickShare Conference

1. Ultra fast setup

- View Connect in less than 7 seconds
- LED ring changes color to indicate connection status

2. Receive camera stream

- From the moment the button is plugged in the stream from the meeting room camera is available for you to use

3. Click to share your device

- Share your screen with the meeting room display with the button
- Easy to clean buttons and touch-less collaboration desktop app is free
- Route the audio output through the meeting room sound system

4. Team collaboration

- View shared content on your own device
- Take snapshots and add them to other applications (e.g. MS Teams or OneNote)
- View and annotate digital whiteboard
- Toggle the application window or desktop that is shared

Touchless Collaboration with the ClickShare Collaboration App

- Software Desktop App
- Walk into a meeting room and instantly connect
- No room selection needed, no pin codes required
- It is intuitive, secure and available for PC and Mac

Pause

Freeze the image shared in the room

Window selection

Select application or document to share

Moderation

Control the meeting and preview before sharing

Second screen

Share and take notes at the same time

Interactivity

Richer collaboration with annotation & blackboarding

Triple agnostic

ClickShare wireless conferencing works with…

Your laptop

Compatible with your laptop or desktop computer

Your conferencing platform

Use your conferencing platform or unified comms (UC) system

Your peripheral

Connects instantly with a broad range of USB peripherals* - speakers, mics & cameras

* A list of validated peripherals can be found our website. Other peripherals, supporting the general USB standard, might work but are not officially validated nor confirmed to work with the ClickShare Conference solution.
